SMS Verification for accounts

After user register, we need to verify the account by PIN

A mobile application registration screen with a yellow header and a white registration form. The form contains three input fields: 'Full name' with a person icon, 'Email' with an '@' icon, and 'Password' with a lock icon and a toggle eye icon. Below the fields is a yellow 'Register' button. At the bottom, there is a link that says 'I have account? Back to login'. The status bar at the top shows the time as 12:44 and various system icons.

Additional Pages

We need create and manage pages with full control over their URLs from admin directly and enabled/disabled on the side button with WYSIWYG:

We recommend using “<https://github.com/rinvex/laravel-pages>”

The pages will similar to Faqs but as pages not only question and answers
